“No holding back, we went completely with our gut when creating and visualising the collection, resulting in uncompromising design, exciting statement pieces and a good dose of fun - that is how we describe Additions 2024.

We are endlessly inspired by the past and its nostalgic good vibes. When designing this collection, we really went back in time and started looking around carefully. We developed a soft spot for vintage finds, ultra retro styles and funky objects. It became a collection for 70's lovers with the courage to go all the way and get excited about interiors that truly make a statement.”

We are endlessly
fascinated by the
70's and its laid back
vibes.

1967, photographer Paul Huf

Here's to the love of retro
and designs that stand
the test of time.

Crafted with a passion for the classics, these bowls are an ode to a time when design was unapologetically groovy. It's retro reimaged, served up with a side of sustainability. The design process was a labor of love, a careful balancing act of honoring the old while embracing the new. No frills or unnecessary tweaks – just the good old retro charm, resurrected for modern-day feasts.
